JULY 2022

On the 12th of July 2022 the consortium of the European Project #COCOFE met in Barakaldo, Spain. Eight representatives from partners' organisations (Eurospeak, Solution, CSI, LFI and FTSI) attended this Transnational Project Meeting, hosted by the partner from Spain, FTSI. It was a very effective encounter for the further development of the project.

The main topic of discussion had to do with the development of the second intellectual output and more specifically with the final review of the 10 lessons developed by all partners. Those lessons will be combined with a mini dictionary that will contain 100 words and 100 phrases from the 10 lessons developed. After the meeting in Barakaldo, partners developed that mini dictionary with words and phrases (including but not limited to contractions, idioms, neologisms, slang, abbreviation, non-aggressive profanities and convivial speech act initiators).

At the end of July, Eurospeak started revising and proofreading the material developed. All 10 lessons will be compiled together with a mini dictionary in August and form the course on Communication Needs and the Practical Curriculum - Informal speech in factories and retail environments, which will later on be incorporated on CoCofe's e-learning platform. It is expected that women refugees and forced migrants will benefit from having a language course tailored to their specific needs and will adapt to changing needs.
